# Refill Instructions
Canon BX-03; BX-3;

1. Drill an 1/8" / 3 mm filling hole on the top of the cartridge about 3/16" from the edge of the cartridge.

2. Attach the needle to the syringe and fill with the black ink.

3. Insert the needle through the filling hole and inject up to 20 ml of ink. Unused ink may be returned to the bottle. Rinse the syringe with water and dry for further use.

Vented Plug DO NOT REMOVE

Sealed Filling Hole DO NOT REMOVE

Nozzle Assembly

4. Use the plug provided or a piece of strong tape to seal the filing hole.

Note: The cartridge will leak if the cartridge is not sealed properly.

5. Reinsert the cartridge in the printer and run a cleaning cycle as per the printer instructions.

Note: Immediately refill any empty cartridges.
